# POULTRY BIOSECURITY GUIDELINES

---

*For Poultry and Bird Owners*

### LOOK FOR SIGNS...REPORT SICK BIRDS...PRACTICE BACKYARD BIOSECURITY!

- When obtaining birds, isolate them away from other birds for 30 days before adding them into your flock. This will reduce the risk of introducing disease into the original flock.
- Your birds should not have contact with wild birds including game birds and migratory waterfowl, rodents or insects as these may carry disease organisms. Outdoor birds should be kept in a screened in area to minimize exposure to diseases.
- Always obtain birds from reputable disease-free sources that practice good biosecurity methods.
- Obtain feed from clean dependable suppliers and store the feed in containers that are bird, rodent, and insect proof. Provide clean fresh

water to your birds at all times.

- Restrict access by visitors onto the premises where your birds are housed. Do not allow people who own other birds to come in contact with your birds.
- Consult your local veterinarian for more useful tips.
- CDFA Ontario Division can be reached at (909) 947-4462.
