

■ Benefits of WCE

1. You, the community member or business owner, get to choose what type of energy resources you use.
2. Your energy will cost less! Right now, you're stuck with whatever SCE charges you, based on whatever rates and contracts they've been locked into with their energy providers. With WCE, we now have the opportunity to negotiate more competitive rates for our communities and pass it on to you.
3. Your local elected officials will be in charge of deciding on energy resources, rate-setting, and program administration, instead of those decisions being made at meetings held by state officials in San Francisco. This means the programs are more suited to your community, and it promotes local accountability and transparency, too.
4. Your community can continue to get more involved and spur economic growth by investing in the development of its own local, renewable energy production.

■ About WCE

Western Community Energy (WCE) is a program that gives local leaders the opportunity to buy electricity directly from its source and then offer it to the community at a more competitive rate than your current utility provider.

This gives you more control of what type of energy resources you use, how the rates are set, and what your energy programs look like—all at a less expensive rate than you're paying now.

■ Becoming a part of WCE

If you are interested in participating in WCE, no additional action will be required. WCE will purchase electricity and partner with Southern California Edison (SCE) to deliver it to you. If you are currently enrolled in the California Alternative Rates for Energy (CARE), Family Electric Rate Assistance (FERA), Medical Baseline, or Summer Discount Programs, you will continue to receive all benefits and discounts, without having to reapply. If you are not interested in receiving your electricity from WCE, you may opt-out and return to SCE at any time.

For a full list of FAQ's and answers please visit westerncommunityenergy.com

IT'S ACTUALLY PRETTY SIMPLE

For a long time, Southern California Edison (SCE) has provided you with two services. First, they purchase your electricity from an energy source. Second, they distribute that electricity to you through their power lines. Two services; very little flexibility.

With WCE, it splits up the responsibilities so that you get more competitive options. Now, you have a say in the kind of energy you get and the price you pay for it. On behalf of your city, Western Community Energy will purchase electricity from an energy source so that you get more competitive rates and programs that fit your community's needs. Then, that same energy is funneled through SCE's power lines just like before, so you never have to worry about a break in service.

■ The Power To Choose

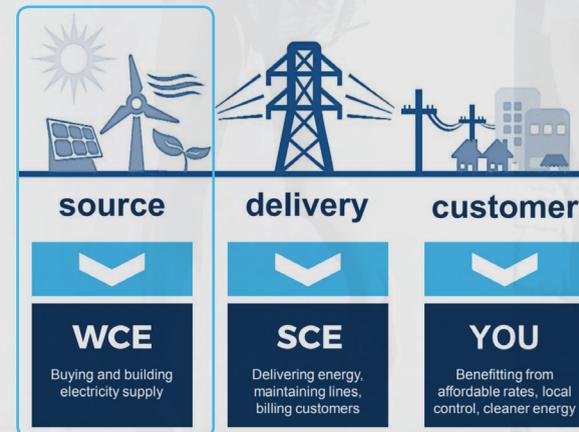

Working with WCE means you have more control over what kind of energy you use. As a Western Community Energy customer, you'll have the option of choosing between different energy packages. Specific rates will be determined as we get closer to 2020.

Choice Plan

This plan is our most economical and uses 35% renewable energy.

■ HOW IT WORKS

+Choice Plus Plan

This plan uses 100% renewable energy and will be provided at a rate a little more than you're currently paying now.
